Description :

PDF-63391 | Incisal edge position is often considered the most important factor when treating complex restorative patients, yet the incisal edges can be in a perfect position and the final result can still fail due to unacceptable gingival levels. The emphasis in the Global Diagnosis system is to determine the etiology of the aberrant gingival positions prior to treatment. The power of the system is that the ... *Global Diagnosis: A New Vision of Dental Diagnosis and Treatment Planning*
