ISBN : #0198784791 | Date : 2016-07-01

Description :

PDF-a5277 | Seventy years ago, Erwin Schrodinger posed a profound question: 'What is life, and how did it emerge from non-life?' This problem has puzzled biologists and physical scientists ever since. Living things are hugely complex and have unique properties, such as self-maintenance and apparently purposeful behaviour which we do not see in inert matter. So how does chemistry give rise to biology? What cou... *What is Life?: How Chemistry Becomes Biology (Oxford Landmark Science)*
